

EASTWAVE VISUAL IDENTITY SYSTEM

Version 0.1

Status: Working Draft

Purpose: Translate EastWave's strategy into visual rules that guide logo design, typography, color, illustration, and website atmosphere.

This document should influence all design decisions before UI implementation.

1. VISUAL PHILOSOPHY

EastWave should feel:

like a creative laboratory operating with Apple Store discipline.

The identity should communicate:

movement

↓

clarity

↓

trust

↓

capability

↓

modern growth

EastWave should feel:

editorial

intelligent

restrained

not loud

not startup-hype

not luxury theater

2. COLOR IDENTITY

Theme Direction:

Ocean + Deep Navy

Reason:

Ocean represents:

movement

possibility

EastWave

Depth

Expansion

Deep Navy represents:

trust

discipline

serious work

commercial confidence

Color behavior:

Primary: Ocean

Support: Deep Navy

Background: Warm White

Accent: Soft Teal

Highlight: Selective Amber

Emotional effect:

bright thinking

deep capability

quiet confidence

Avoid:

electric neon

purple gradients

pure black

corporate blue

high saturation

3. TYPOGRAPHY SYSTEM

Reference Feeling:

Apple × Notion

Meaning:

Apple: confidence through restraint

Notion: clarity through simplicity

Typography should feel:

editorial

precise

human

readable

slightly premium

Rules:

Large headings.

Short paragraphs.

Generous spacing.

Readable body.

No decorative fonts.

No futuristic fonts.

No heavy geometric overload.

Headlines should feel:

observed

not announced.

4. LOGO DIRECTION

Logo Architecture:

Symbol + Wordmark

Reason:

Symbol:

creates memory.

Wordmark:

creates clarity.

Together:

build recognition.

Logo characteristics:

minimal

scalable

timeless

confident

clean

Possible themes:

wave

signal

current

motion

bridge

growth

system

connection

Logo behavior:

Navbar: compact

Footer: full expression

Hover: subtle response only

No:

rotation

glow

3D effects

aggressive animation

Logo feeling:

the kind of logo that still feels correct in ten years.

5. HOMEPAGE VISUAL LANGUAGE

Primary Content:

Typography.

Support:

Illustrations.

Hierarchy:

Meaning

↓

Type

↓

Illustration

↓

Interaction

Illustrations should explain.

Not decorate.

Possible illustration themes:

system maps

flows

grids

growth loops

network diagrams

market movement

business transformation

Avoid:

stock photography

fake team images

AI robots

people at laptops

office handshakes

6. ILLUSTRATION STYLE

Illustrations should feel:

editorial

diagram-like

slightly technical

clean

quiet

intelligent

Use:

thin lines

soft fills

depth

structured layouts

Avoid:

cartoons

over-detail

3D scenes

isometric overload

gaming aesthetics

7. PAGE ATMOSPHERE

Reference energy:

Creative agency

x

Editorial publication

x

Product company

x

Design system

Visitors should feel:

“these people understand systems.”

Not:

“this looks expensive.”

8. SECTION VISUAL RHYTHM

Hero: Light

Build: Light

Method: Light

Proof: Deep Navy

Offers: Light

CTA: Deep Navy

Use dark sections intentionally.

Dark means emphasis.

Not theme.

9. MOTION SYSTEM

Motion should feel:

quiet.

Use:

fade

reveal

small movement

gentle expansion

Do not use:

dramatic transitions

cinematic scroll

over-animation

parallax overload

Rule:

motion must increase understanding.

10. WEBSITE REFERENCE PRINCIPLES

Reference: BBDO

Borrow:

editorial confidence

bold type

clarity

creative restraint

Do NOT copy:

layouts

branding

interactions

EastWave should feel:

more strategic

more systematic

more digital.

11. VISUAL TEST

Before approving visuals ask:

Would Apple remove this?

Would Notion simplify this?

Would BBDO still respect this?

Would a marketplace founder trust this?

Would this still look modern in five years?

If not:

reduce and refine.
